

ECON 5350 Problem Set #8

Presentations. Each group is responsible for a presentation of the topic below. The presentation should involve econometric theory and a MATLAB application. You are free to use simulated or actual data. Please send me copies of your slides, data, and code prior to class. I will post them on our class website. Presentations will be scheduled during the week prior to finals and should be approximately 45 minutes.

- Presentation #1. Alivia and John. (TOPIC: Recursive residuals and structural change.)
- Presentation #2. Sruta and Furyal. (TOPIC: Delta method.)
- Presentation #3. Nida, Marco and Irene. (TOPIC: Bootstrapping.)
